BAG DEPALLETISING, CUTTING AND EMPTYING SYSTEMS
Fully automatic robot based systems to automatically pick the bag from the pallet, cut it, empty the product in a dedicated hopper and dispose the package.

SCREW CONVEYORS
Special design, pharma execution, heated or cooled, under vacuum to reduce air content.

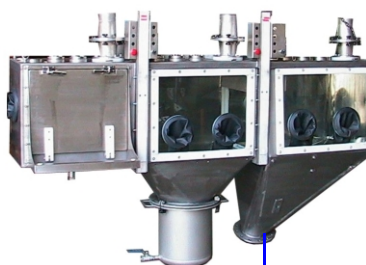

BIG-BAG DUMPING STATION
a wide range of models even for packing powders.

AIRPOWDER
pneumatic dense phase convey system for highly packing products b.e. Talc, Caolin, Titanium dioxide, Sulfur, Calcium Carbonate etc.

AIRPULS
pneumatic dense phase low speed convey system. It doesn't damage the product, avoids pipe wearing with abrasive products. Low noise level and reduced filters' surface.

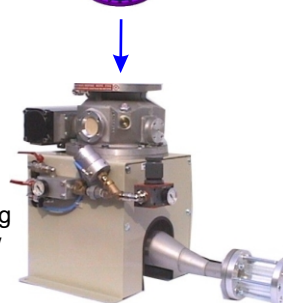

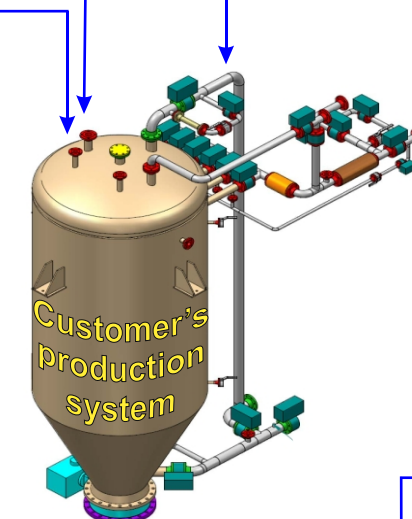

GLOVE BOXES
for toxic products and air free process.

SLEEVES FILTERS
robust and easy cleaning design. Big doors for an easy access to the sleeves.

SILOS
Fe, AISI and aluminium made.

BAG FILLING AND PALLETISING
Fully automatic robotised bag filling and palletising systems.

We find solutions to your daily technical issues since 1926 !
